## Bluewater Adventures – Just Announced by National Geographic Adventure Magazine as one of the “Best Adventure Companies on Earth!” – *January, 2009*

In the present issue of National Geographic Adventure magazine, Bluewater Adventures is rated among the top companies in the world to travel with. Scoring 100% in Customer Satisfaction rating and 93% overall, we are thrilled to be placed amidst the worlds’ best once again. This is following a selection by National Geographic Traveler magazine as one of the Worlds 50 Best guided tours! Operating world class eco-cruises in this area, Bluewater Adventures continues to stand by our values and our commitment to preservation and conservation on the coast.

Bluewater Adventures is based out of North Vancouver and specializes in providing clients with unforgettable wildlife experiences. We operate tours to a variety of unique destinations along the Alaska and British Columbia coast – the Great Bear Rainforest, Haida Gwaii (Queen Charlotte Islands), Northern Vancouver Island, and Southeast Alaska. Guests get to experience incredible wildlife, native history and culture, and the natural history of the coast with a first class crew. Explore ashore daily with naturalists, kayak, and travel island to island. aboard the 70” sailing yachts, The Island Roamer and The Island Odyssey, and 65’ power cruiser Snow Goose. These trips are small group tours, allowing everyone to experience the coast in an interactive style that many have referred to as the “trip of a lifetime.”

One reason National Geographic selected Bluewater Adventures is our commitment to the environment and conservation. Bluewater is **the first small ship operator on the British Columbia and Southeast Alaska coast to offer Carbon Neutral trips!** Operating world class eco-adventures, Bluewater Adventures continues to stand by their values and our commitment to preservation and conservation on the coast. Becoming carbon neutral was a measurable company objective. This is simply a first step of many for Bluewater as we seek to reduce our emissions and contribute to a more sustainable future on the coast. We will continue to research sustainable tourism practices and encourage other ecotour operators to join us in acting now to protect the environment.

Bluewater Adventures has been operating Eco-Tours off the British Columbia and Alaska coast for 35 years. Owned by Randy Burke, they operate two 70 ft Ketches, named the Island Odyssey and the Island Roamer, and one 65 ft Steel Motor Vessel, named the Snow Goose.
